

Daedalus

Airside driving (East)

Aim

To provide persons driving airside at Daedalus with a knowledge of the potential hazards they may encounter and the correct procedures to follow to ensure flight safety is maintained.

Daedalus East access

Access to businesses or private hangars situated on the Eastern side of the Airfield is made through the South East dispersal gate.

The South East gate is a manually operated gate situated adjacent to the innovation centre.

Your host / employer will provide you with the code for access.

Daedalus East access

Unauthorised persons and vehicles will require an escort from the host at all times whilst on site, including to and from the gate. These should be contacted via telephone on arrival.

Daedalus East manual access

Please note the following steps to ensure you are familiar with the process of gaining access.

Daedalus East manual access

Stop in front of the gate and approach the latch.

Lift open the black cover to reveal the buttons underneath and enter the code.

Daedalus East manual access

Pull the handle down to open the gate.

Open the gate fully before returning to your vehicle.

Daedalus East manual access

Drive through the gate and stop in a safe area.

Close the gate behind you. Please hold the gate as you close it, do not swing it shut as this can cause damage to the mechanism.

Daedalus East

Once you have entered through the gate **you are now on an active airfield**. The following rules **MUST** be obeyed at all times.

Daedalus East speed limit

The site speed limit at all times and in all places is 20mph.

Highway code

The highway code applies at all times whilst driving on site.

Mobile phone use whilst driving is strictly prohibited.

Vehicle lighting

Dipped beam headlights should be used at all times.

Hazard lights and obstruction lights (when fitted) must also be used at all times when driving on site.

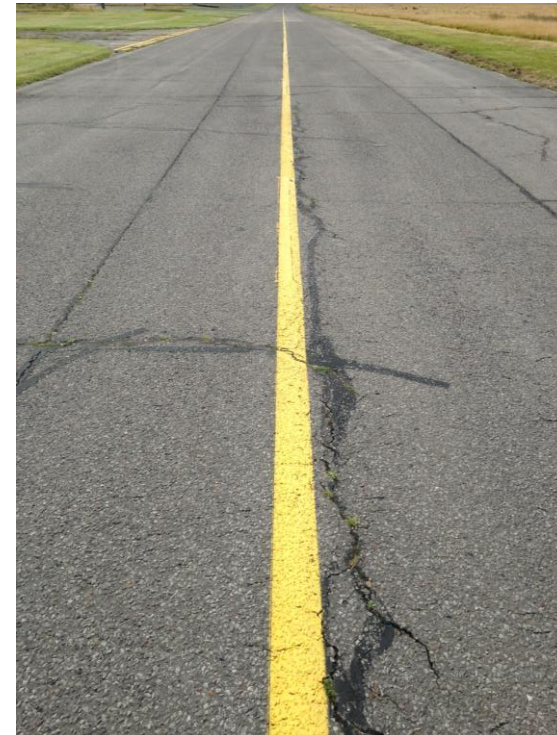

Airfield Taxiways

When driving on the Airfield you may drive on an Aircraft taxiway.

The taxiway is easily identified by the solid painted yellow centreline running down the middle of it.

Aircraft use taxiways to transit around the Airfield.

Aircraft have absolute right-of-way

Aircraft have absolute right of way at all times.

If an aircraft approaches please find a suitable location to pull over to allow the aircraft to pass.

Giving way to Aircraft

Give way to aircraft by safely pulling over in a suitable location and stop to allow the Aircraft to pass. Note the wing tips may overshoot the taxiway, safe clearance should be given to Aircraft at all times.

Helicopters

Some rotary traffic may be hover taxiing. Do not drive underneath them.

Helicopters produce a lot of downwash from their rotor blades. Remain well clear at all times.

Emergency Vehicles

Emergency vehicles responding to an emergency and operating their emergency lighting shall have right-of-way over all other ground vehicles.

FOD

FOREIGN OBJECT DEBRIS

FOD is everybody's responsibility. If seen please pick it up if safe to do so.

If it is unsafe to do so, contact Daedalus Ops via radio or telephone 02392 551714 and report it.

Taxiway hold points

This is a taxiway hold point.

It is a holding point for Aircraft before entering the runway for departure.

On no account should vehicles cross this point without permission from the Airfield authority.

Identifying taxiway hold points

Hold points can be identified by the double solid line followed by a double pecked line painted horizontally across the taxiway.

The hold point will be flanked both sides by signs indicating the hold point designator (D1) and the runway beyond it (23).

Parking

Your host/employer will explain where a safe place to park on their demise is.

Please ensure you do not park in the close vicinity of Aircraft or obstruct Aircraft manoeuvring areas.

Fuel bowzers

Numerous fuel bowzers operate around the site. Please be aware of them and the highly flammable fuels they contain. Do not park in close proximity to them and allow a wide clearance when passing. Especially when they are conducting refuelling operations.

Contractors

Numerous contractors operate at Daedalus. These vary from grass cutting to construction workers. Please keep a good visual look out for them at all times.

Breakdown procedure

In the event of your vehicle breaking down whilst on site please try and stop in an area not obstructing other traffic / aircraft.

Contact Airfield operations

02392 551714

If unable to contact, flash lights towards the control tower and await assistance.

Operations team

If in any doubt contact the
Operations team.
