Others (specify)	6.7

SUMMARY OF ACTIVITIES

- Towing Glider Trailers in the UK
- 2. Towing Glider Trailers on the Continent.

SUMMARY OF HAZARDS

- 1. Vehicle and Trailer stability
- 2. Roadworthiness of the Trailer
- 3. Fatigue
- 4. Loss of control in High winds.
- 5. Rough ground and access to fields.
- 6. Speed control and braking.
- 7. Lack of towing experience particularly with long trailers.
- 8. Lack of experience with regard to Continental driving.

POPULATION AT RISK (inc No.)

Driver plus passenger and other road users.

CURRENT SAFETY PRECAUTIONS & CONTROL MEASURES

- 1. Legal requirements of towing trailers.
- 2. Car and Trailer combination within legal weight limitations.
- Insurance cover for towing trailers.
- 4. Repatriation insurance for damaged gliders/trailers/vehicles (required for Continent)...
- 5. Supervision and training for novice trailer drivers.

	CURRENT RISK ASSESSMENT	HIGH	MEDIUM	4B	LOW	
--	-------------------------	------	--------	----	-----	--

RISK REDUCTION ACTIONS

EINIAL DICK ACCECCMENT

- 1. Shared driving on long journeys.
- 2. Experienced towing drivers to car share with novices.
- 3. Regular maintenance checks on car and trailers.
- 4. Use correct towing speed (which may be less than maximum allowed).
- 5. Do not tow in adverse weather. (Wind., poor visibility, etc).
- 6. Check condition of 'unmade' roads and tracks before using them.
- 7. Check condition of fields and obtain landowners permission before driving onto property.
- 8. Travel in 'convoy' with other trailer combinations where possible.
- 9. Minimise Continental driving distance by using longer sea crossing routes.
- 10. Suitable tow vehicle (weight & power ratio)
- 11. Avoid turning too sharply and allow plenty of room for the 'over-swing' at the rear of the trailer.

GUIDANCE NOTES

For further guidance on completing this form contact the PNGC Safety Officer

Risk Assessment

Will be completed by the PNGC Safety Officer or Administrator.

No.

Organisation Tick the appropriate box.

Activity Tick the appropriate box.

Hazard Identification

From the Hazard Identification Check List select all hazard types applicable to the task/activity being assessed and enter the hazard identification code in the appropriate box.

Summary of Activities and Hazards

Briefly describe the key aspects of the task/activity being assessed and how the hazard(s) may arise. Look only for the HAZARD(S) which you could reasonably expect to be present and which may result in significant harm under the conditions of your task / activity. In addition to hazards, which arise from "normal operations", consider also likely abnormal and emergency situations

Population at Risk

State the approximate number of people likely to be effected by the hazards of the task/activity. Don't forget it may not be just personnel carrying out the activity who may be effected. Consider also third parties.

Current Safety Precautions and Control Measures Describe the control measures or precautions already taken to reduce the risks from the hazards you have listed? e.g. Training, supervision, written procedures, fitting of guards and covers, provision of special tools or work areas, adequate information, instruction and safe systems etc

Current Risk Assessment Assess the level of risk taking into account the current control measures and precautions using the matrix below. Consider first the likely probability of the event arising and identify which row of the matrix is applicable. Then consider the most likely outcome of the hazard being realised in terms of personal injury or environmental impact and identify which column on the matrix applies. The box at which the two crosses will fall into either the low/medium/high risk sections of the matrix. i.e.C3

Risk Reduction Actions Have risks been reduced to a level that is as low is reasonably practicable? It may help to consider if the current measures have to meet standards set by regulations, Air Navigation Order, BGA Laws & Rules, HSE guidance and local Agreed Codes of Practice (ACOPS). Where appropriate identify further risk reduction measures.

Final Risk Assessment Now re-assess the expected level of risk assuming the further risk reduction measures identified are in place.

Date of Next Review

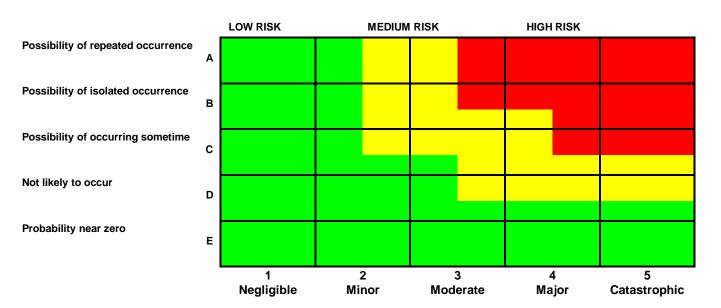

Assign a date for the next review based on an estimate of the likely hood of changes occurring that may effect the validity of the assessment.

Acceptability of Risk

LOW: No action is required if a hazard falls in this area, although some cost-effective improvements may be judged worthwhile.

MEDIUM: If a hazard falls in this area, a cost versus benefit analysis will help decide whether remedial action is taken or the risk accepted.

HIGH: If a hazard is judged to be in this area the activity is not to be carried out until corrective action are implemented to reduce the risk to a lower level.

HAZARD IDENTIFICATION CHECKLIST

1	FLYING ACTIVITIES
1.1	OPERATIONS
1.2	FLYING TRAINING
1.3	RISK OF COLLISION
1.4	AIRMANSHIP
1.5	VISITOR MANAGEMENT
1.6	OTHER
2	MECHANICAL HAZARDS
2.1	DRAWING-IN / TRAPPING
2.2	IMPACT
2.3	STABBING / PUNCTURE
2.4	FRICTION / ABRASION
2.5	HIGH PRESSURE FLUID INJECTION SLIPS / TRIPS / FALLS
2.6 2.7	FALLING / MOVING OBJECT
2.7	OTHER MECHANICAL HAZARDS
2.0	OTHER MECHANICAL HAZARDS
3	ELECTRICAL HAZARDS
3.1	DIRECT CONTACT
3.2	INDIRECT CONTACT
3.3	ELECTROSTATIC PHENOMENA
3.4	SHORT CIRCUIT / OVERLOAD
3.5	SOURCE OF IGNITION
